

NASA Earth Sciences Research Results Portal

Researchers feel their **results are going unnoticed** by leadership and communication teams.

Leadership find it **challenging to find research examples** for presentations, reports, meetings etc

Communications and outreach teams are **constantly searching for content**

So....

NASA Earth Sciences created the **Research Results Portal**
<https://esdresearch.nasa.gov>

As a NASA center civil servant or contractor or a PI on a NASA Earth Sciences funded grant, we invite you to share your most exciting results with ESD Leadership and the Communications teams by creating an entry in the Portal

For more information, contact Megan McGroddy (megan.e.mcgroddy@nasa.gov)
